

Would Be Nice Features

I would upgrade the motherboard to the ASUS ROG Maximus XI Code Z390 Gaming Motherboard. I would also get a External CD Drive USB 3.0 Portable Slim External DVD Drive. I wouldn't spend as much money on a sounds card since it isn't a much of a necessity in a photo editing computer.

Photography & Organization Computer

DREAM
MACHINE

DREAM MACHINE (\$2000)

My dream machine with a \$2000 budget would be a 13-inch MacBook Pro, from Apple (\$1,949.00). It has a 8th-generation Intel Core i5 processor and turbo Boost up to 3.9GHz, but for an extra \$350 you could get a i7 8th gen processor. It has 8 GB RAM and 256 GB SSD, which you could also get upgraded.

Photo editing & Organization Computer

Photo editing computers are used by photographers and their editors to produce their best work. People who have made a business out of photography like wedding photos, photo studios, influencers or people rely on photo editing computers. Good photo editing computers have a decent graphics card, good CPU processor, a good amount of RAM and a good motherboard and monitor.

Budget Machine (\$800)

If my budget was only \$800 I would get the HP ProBook 440 G5 Laptop from Best Buy. Even though it only has 8th Gen Intel Core i5 processor it still serves its purpose at its given price point, which is \$649.00. It has 8GB of RAM. and 256 GB SSD. I would've preferred a i7 intel CPU.
